

## Are you starting to ask questions about COVID-19?

**iMOP** INFORMED  
MEDICAL  
OPTIONS  
PARTY

### Who is at risk from the SARS-CoV-2 virus

- The W.H.O. and Australian Health Department claim those who are at high risk of severe COVID-19 are the elderly or others with lung or heart disease, diabetes or other conditions that affect their immune system<sup>1</sup>. Yet, the ongoing trials of the AstraZeneca, Novavax and Pfizer vaccines, all scheduled for Australia, mainly involve healthy participants. The “high risk” groups are grossly underrepresented or excluded.

### How safe are the COVID-19 vaccines?

- The **Pfizer** vaccine has been given “provisional” approval<sup>2</sup>, and yet the trial is ongoing for another two years<sup>3</sup>. Some people have experienced **severe allergic reactions**<sup>4</sup>.
- The **Novavax** trial is expected to be completed in 2022<sup>3</sup>, well before a valid assessment can be made concerning hypothesised **vaccine-induced autoimmunity**, referred to in the trial protocol<sup>5</sup>.
- One of the **AstraZeneca** vaccine trials isn’t expected to be completed until 2023<sup>3</sup>. The vaccine insert states “**Very rare events of demyelinating disorders have been reported following vaccination**”<sup>6</sup>.
- The Australian government has “invested” \$3.2billion into COVID vaccines<sup>7</sup>. Yet the TGA and FDA have admitted that they **do not yet know if the vaccines will reduce transmission of the virus**<sup>8</sup>. Many conflicts of interest are not disclosed by governments that promote vaccines<sup>9</sup>.

**Australians are part of a global human vaccine experiment that can hardly answer the question “what are the long term side effects?”.**

## Why is there censorship?

- The censorship, suppression of information, and frequent ridicule of those who speak for freedom of choice or greater transparency, has prevented valid concerns being heard. Governments have established a particular narrative within the media, and any contrary views, even from medical and scientific specialists, are not broadcast.
- Extreme COVID control measures have caused **international and local Doctors, Scientists, Medical Specialists and practicing Health Professionals to voice their concerns** about the damaging consequences of government policies.
- See: **WorldDoctorsAlliance.com; AmericasFrontlineDoctors.com; GBdeclaration.org** and **COVIDMedicalNetwork.com** in Australia. As at 6 March 2021, The *Great Barrington Declaration* from epidemiologists, has **55,161 signatures (and growing) from Scientists and Medical Practitioners globally**, who recommend an approach they call "Focused Protection". Groups of Lawyers in Australia and around the world are taking court actions against government interventions<sup>10</sup>.

## Why is government spending billions of dollars on experimental vaccination when:

- a) other means to protect against severe disease such as vitamins and minerals, nutritious diet, exercise, etc. to improve immunity should have been subject of well-funded health education years ago.
- b) some proposed treatments should receive similar publicity and approval for experimental use<sup>11</sup>.
- c) the great majority of the community are not at risk of severe illness, as stated by the W.H.O.<sup>12</sup>.
- d) not only are most infections not severe but even as much as 43% of infected people don't get sick<sup>13</sup>.
- e) infected children seldom become ill or transmit the virus. So mass vaccination of children is not justifiable<sup>14</sup>.

### What are your rights?

As per the Australian Immunisation Handbook<sup>15</sup>, risks and benefits of a vaccination must be explained for valid informed consent. It is not possible to give valid or informed consent to a vaccination when the risks or even benefits are undetermined.

### What legal action can you take?

If you feel pressured or COERCED to be vaccinated, wear a mask or take a PCR test against your will, help is available. Contact the legal team **AdvocateMe.com.au** to join one of their class actions and/or get access to their letter templates.
